### SLUE BUMPLER, ST. PAT'S QUEEN BY BRIBE

#### Politics Again Score on St. Pat's Board

The under world takes great pleasure in announcing to the public their queen for the annual drunk. (From all indications you'll have to be drunk to stand it.) The latest report is that the five foot (two flat), blurry-eyed beauty is to be carried to the throne by one of the drunken politicians. It is not known whether she is too weak to walk or just what, but we do know that it will be to her advantage to hide those slightly bent legs from all on-lookers. We hope her dress isn't too long though, as the part that drags on the floor may get her down. It is said that the photographer cut the legs on his tripod to get her picture. Why don't the St. Pat's Board furnish stilts for their queen?

Speaking of the St. Flats Board and their political machine, don't be surprised when you see all the board members riding around town in a new Buick; free transportation was one of the offers of the queen. My! what four-wheel personality. It looks like the co-bosses Hamper and his room-mate Felkinghimmer will get to drive as they were the power behind the throne. (Hear tell there was a little dirty politics too—now is that nice?) To those members of the board that do not like to ride in Buicks,

(Continued on Sheet Two)

### SLOB HORSEY NEGLECTED ST. PAT

The Mineur stewed-ants are still trying to ream the stench out of their nostrils and the scum off their eyes, which was raised when Slob Horsey was neglected St. Patrick by the St. Pots, bored for the St. Pats bored. Of all the bit shums ever to lurch drunkenly up the venerable scaffold, this rabbitrear takes the furlined thunder-mug. It's yours, Slob; loud may it roar.

Slob "Skatterbranes" Horsey has a character as plain as the writing on the outhouse wall (including the atmosphere). Two years ago he rolled into town in characteristic style on the noon freight and after visiting with Roe a couple days in the city can (which no bum has been able to sleep in since) he started his bootlicking and handshaking campaign. The first fruit of this fruit's politics was the presidency of the Junior class. There's nothing to the rumor that he won it in a crap game, he came from the city where they have more refined methods. Slob is a ladies' man. Maybe it's that alley-cat look in his eye that makes them twitch at his soup-tail approach. What Sloilo rut was he out riding—with when his date arrived at de pot of Rolla last year. The Casanova is afraid to throw rocks when he is in his home town, in fact he's afraid to go home.

Horsey claims to be the first honest man to ever be elected

(Continued on Sheet Fore)

### CONFUSCIUS SAY

The man about Pine Street as he sees it, the bright lights beaming, the drunks scheming and the world comes to an end as a sober man walks by. But getting back to what the Big Chief Confuscius says, such as the old duck Dr. Cheesy, the man who tries to stop drinking at M. S. M. raises big stink by filling his pretty red wagon. From all hearsay, it would be easier for him if he tried shoving butter on a wild cat with a hot awl.

This wise old Chinaman told me the other day that Percy Pill would be much better off by just sticking to his two bit gardeners than trying to coach the drunks to play basketball. Along that same line, Old Doc Hobble still makes a better chief glass wiper to Der Cheesy than a learner of the dumb petroleums.

I've been told here lately that the wearer of the green pants, Dinton Flueman, didn't do so good in his adventure into politics and for other members of the St. Pat's Bored the Chief Cob on the Corn they got for

(Continued on Sheet Three)

## 8 Foreign Lands, 34 States Are Represented Here

Probably the second most asked question when two people meet is "Where are you from?" So this week the MINER set out to answer the question. We snooped and snooped and here is what we found.

Listed in the records of M. S. M. are students from seventy-seven of Missouri's one hundred and fourteen counties, thirty four states, and eight foreign countries. Missouri of course leads the list in the number of students with 641 while Illinois takes second place with 86. Then, quite surprisingly, New York pulls down third place with 48, and right after it with 34 comes New Jersey. In sixth place is Massachusetts with 13, and following with 9 is Wisconsin. Next in their respective order comes Arkansas, California, Colorado, Connecticut, District of Columbia, Florida, Georgia, Idaho, Iowa, Indiana, Kansas, Kentucky, Maryland, Michigan, Minnesota, Mississippi, Montana, Nevada, Ohio, Oklahoma, Pennsylvania, South Dakota, Tennessee, Texas, Vermont, Wyoming, West Virginia, and Utah.

From the foreign countries are four students from the Philippine Islands, two from Peru, two from Canada, two from China, one from Turkey, one from British West Indies, one from Mexico, and two from England.

The total on all the students is 895 which is a 10 per cent increase over last year.

## Dr. D. C. Jackling To Receive Award

On April 15 Daniel C. Jackling will receive the Washington Award at a meeting of the Chicago Section of the American Institute of Mining and Metallurgical Engineers. The Washington Award was founded in 1916 by John Watson Alcock "In Recognition of Devoted, Unselfish and Pre-eminent Service in Advancing Human Progress". It is Sponsored by the Western Society of Engineers and the our Founder Societies.

Mr. Jackling graduated from MSM in 1892 with a B. S. in Metallurgical Engineering. He received a degree of Metallurgical Engineering from MSM in 1903 and a Doctor of Engineering in 1933, also from MSM.

Mr. Jackling has also won the Mining and Metallurgical Society's Gold Medal for distinguished service in 1926, the William Lawrence Saunders Gold Medal in 1930 given by the AIMME, and the John Fritz Gold Medal in 1933.

Jacob C. Stroup, ex'14, mill superintendent at the Santa Rosa Mines, Jose Panganihan, Camerines Norte, P. I., has returned to the States and may be reached in care of F. O. Williamson, 911 Hobart Bldg., San Francisco.

those relating to employment status. Information is wanted on the following points:

Number of weeks the student worked in 1939 (equivalent full-time weeks).

Number of hours he worked during the week of March 24-30, 1940.

Present, or if seeking work, last occupation (exact nature of duties performed).

Present or last industry (kind of

vama. The Tucker, and Norman, have taken the physical examinations and have been accepted into the Aviation training program of the United States Army. They went to Scott Field in Illinois for the examinations.

John Werner, who graduated in January, 1940, has been employed by the Surface Combustion Corporation of Toledo, Ohio. Seb Hertling has accepted a job on graduation with the Braznell Ink

the Phillips Petroleum Company.

Four seniors recently went to Oklahoma to be interviewed by several companies. They were Harley Ladd, F. M. Stewart, Woody Burgess, and Bill Dickman.

### First St. Pat's Celebration at M. S. M. Held 32 Yec

St. Patrick, the Engineers' beloved Saint paid his first visit to the Missouri School of Mines campus on the 17th of March, 1908. This first celebration was an impromptu affair with the students cutting classes to make the day a holiday. This holiday has stuck through all of these years. However, the next year held another celebration which was a real celebration. The affairs was engineered by the Junior class and the program took place at Norwood hall.

In 1910, the senior class postponed their trip so that the Saint could hold the Knighting services but there was no official program. 1911 brought St. Pat's celebration with a larger turn out than previous years, St. Pat arriving on Frisco No. 9. The patron Saint arrived later in 1912, not making the campus until March 18th. Even with his late arrival, the gaiety was even more than before.

The traditional "hand car" arrival was adopted during the celebrations held by the class of '13 and the Blarney stone was adopted. 1914 and 1915 saw the cele-

1923 but this year saw the biggest attendance since the begin-

"Life" went to the parties during the celebrations of 1938 but

#### ON THE BEACH by Slobby Slevins

Rumor has it that Blurb Cramper is getting powerful in political circles. In fact, he circles like the whiffle bird in ever diminishing circles with increasing velocity until finally he disappears in his own anatomy. Hamper, you should hunt a hole after digging up a mess like Jerke and the Belta Zither band for \$5.50 per capita. (26 cents in St. Louis.) Well anything you'd do Twerpy isn't surprising after the Jooger Dree incidents. They itch don't they? Keep your candle burning on both ends Sturby, and gobble gobble.

Politics is a dirty mess anyhow. Senator Oldsot is more or less upset and pres Tedo isn't exactly calm. Could be that models have that effect, eh Pres? Fire! Fire!

A bouquet to Shrieke for being elected president of everything but the Stupid Council and St. Pat's Bored. This includes the Bit Shums Association of which he is Bit Shum in chief. Anyone who can crib like Streaky has ability. His only rival is 3 pint Full Leper. Slowan the cow and King Cockerbill sold out to a local sheet. It's a hell of a note when students have to pay \$1.50 per

#### CAMPUS FERTILIZER

year for one copy per week of a small town daily. At that it's better than the miner staff can do with their dirty rag. If the Crockpills and Cowhands weren't so busy with their "vacuum tubes" in the Army and Stink Depts. they could put out a better paper.

Too bad Foul Penny hasn't more fingers to get in the pie. As top kick on the Hollowtoe squad, he and his crooked aid, Crawl Howling will probably buy theirselves new cars for graduation presents—or will Mr. Benny use the money to pay off election debts?

It appears that Scowl must have gone broke before the Stupid Council elections—or did Seedy outbid you? On the other hand, maybe the Stupid Council wouldn't sell out—not much. The only man that couldn't be bought was Dern Deaky and he was offering bids for himself. Sneaky might have been elected if he could have sneaked in some shoe factory votes as in the senior elections.

Skinny Sardine, the Galesbury Guzzler, might have been St. Pat if he hadn't played ball with Flint Screwman who is from the wrong side of the river.

Just as we go to press, we understand Golumbo Berdi has a worried look on his face. Congratulations, poppa!

So long, folks! . . . See you at the Miner-Trenchmouth football game in the Toilet Bowl next New Years.

#### MODERATE CHIN AND PANTS SCRAPER

Faces thoroughly butchered while you wait.

Clothes neatly mutilated.

\$5.00 prize if you go to sleep while we're working on you.

#### SLUE BUMPLER, ST. PAT'S QUEEN BY BRIBE

(Continued from Sheet One)

arrangements have been made for them to get an extra supply of clothing from the "STINGY STORE." Maybe the board will get a good reduction on their new tuxes and their sweaters for next year.

What's the matter boys, couldn't you all cooperate well enough to get new cars, or did the dance chairman refuse to divide his cut? With all the money he made on this Boob Jurke deal, he'll more than likely show up with a Packard.

If there were such a thing as a consolation prize in the race for St. Pat's queen, we the underworld would like to present it to Miss Sug Hamilterror. It was so close that Miss Salt had already made reservation with a candid camera man in the big city. Too bad—next time don't be too sure cause anything can happen in politics. Why don't you start now and maybe by next St. Pot's you'll be with the right click.

We understand another disappointed queen hoped to have been is Leany Joyd. Too bad again, and after you and Baggie had spend so much on those elaborate buffet suppers trying to impress certain boys. Could be you worked on the wrong boys—stick to your football so-called heroes. The boys did admit that if you had had a little more to offer, your chances would have been better, you were coming close. If they decide on a high chair queen again next year, it should be a walk-away for you Beany. Experience is the best teacher.

Epitaph on an old maid's tombstone: "You can take it with you."

## CAMPUS FERTILIZER

Sheet Three

### AS A MANEUR SEES IT

Hats off to dear old Erector Cheesy for the way he has stopped drinking. You shouldn't be so hoggish though Cheesy. After all, you and Don. Q. should share your grain alkies with someone beside Flarmsby and Mother Cubbard.

Old Mother Blubbard waddled to the cupboard like a baby with the colic, to get her poor stooges some booze money. At this stage of the game, Dr. 10 c.c. Skunkie Wunkie walks in and says his boys must come home (he has a cleaning job to do). How did it taste, Slowan?

Dilute Boots Slayton scares all his Mets away from class by running a booking agency. Aplobitz seems to be taking quite a beating.

Dr. Copyright Flann being so damn simple doesn't even rate a by-line.

It looks like Sipper Barrelton would learn to leave these crooked gamblers alone. There are a few card sharks and domino slickers in the C. E. Department.

The students really owe Dog Cheesy a lot for making the grass grow on the campus, even if he is gone most of the time. The business office could save a lot of money on this fertilizer. The Hussel Brothers carry a very exclusive line of elephant dung—neglecting the pungent odor, but the School of Mines

### SUCKERS ROLLEMOVER SODA SLOP

has two of the best elephants on reserve. Why not have Major Sorten hold his classes on the campus? Forkerson is supposed to count money, but there isn't any money to count. Don, you really should do something in your pot and help out with free fertilizer.

### CONFUSCIUS SAY (Continued from Sheet One)

the annual drunk really smells. The man responsible is none other than Flerby Damper the boy who burns the candle at both ends and is libel to get burnt himself if the end or would that be the middle, get what I mean, Damper?

Confusius Brother say "Joe Blow talk too much."

Confusius now say I'd better shut my trap before I step my foot into it, eh Harmsby, you old snooper. For a few grade points, I'll tell you who is responsible for all this nice clean bunk.

### THE STAFF APOLOGISES

We wish to take this means of apologising for the fact that our paper is so clean. The staff, having been brought up under such noble tutoring as that of Unkel Dom Fingerfest of K. C., Shimmy B. Hinds of N. Y., and Kernel Timber of Rolling, are, in general, pure in heart. Without

doubt, we abhor every evil thought and doubly abhor those relating to politics.

We also wish to state our regrets for not having been able to obtain the services of the sophomore whose mind wandered through the sewerage system of this fair city, and then came up plastered on the Feb. 29th issue of the Miner. There are no doubt some of our dear readers who appreciate that filthy type of dirt more than they appreciate a clean sheet like this. We wish to assure you that we are making every effort to have this sophomore on our staff in the years to come. Negotiations are now under way with Slowan, Cockerbill, Bumstead, and Cheesy to have this young slinger of foul phrases transferred to our staff in order that we can put out a dirty sheet that no doubt will be more enjoyable to the aforementioned negotiators who now control this evil minded, foul-mouthed sophomore.

Finally, we wish to apologise to the powers that be for not getting drunker during this glorious St. Pats Festival.

Sincerely,

THE STAFF.

#### Sheet More—nuff

### SLOB HORSEY NEGLECTED ST. PAT

(Continued from Sheet One)

St. Patrick here. If we ever had an honest St. Pat here he would have hair on his teeth and a crow-bar up his back, running around hollering "Hardware for sale." He's drunk enough hair tonic to have hair on his teeth but where in hell does that hair on his palms come from? And who steals all the raw eggs out of the Thatter Krapper icebox? It's common knowledge that Horsey is so low he can stand flat-footed and kiss a humming bird's axle without bending his knees. Creditors say getting money out of Horsey is like soothing a turpentine wildcat with a sandpaper poultice. Yes indeed we have a St. Pat this year who has everything, at least if he ain't got it now he's going with a coupla scopes who'll damn soon have him fixed up.

#### EPILOGUE

Here, now, oh master, in your success,  
Be too certain and forget to bless  
The rain that keeps the fertilizer moist.  
Don't to soon, yourself to glory hoist.  
For let but once the summer sun  
Get in his work and to green from dun  
The color will change, and once again  
May wondering feet find some sweet lane.

#### THE BRESTE DRESS SHOP

Try our special Cheree Brassiers and panties with the exclusive Mousetrap feature.

Try our slacks shaped like a boat dock to catch the sucker with that "any old port in a storm" feeling.

#### CAMPUS FERTILIZER

A medical student who had been drunk the night before came to class the next day in a slightly hazy frame of mind. Much to his dismay he discovered that a quiz was being given in one of his classes. One of the questions was to name five reasons why mothers milk was better than cows milk for babies. In answer to this he wrote on the paper the following:

1. Easier digested.
2. More sanitary.

He studied a while, then wrote

3. Much easier to take on picnics.
  4. The cats can't get it.
- After a few more minutes study, he finally came on the fifth answer, and wrote
5. Comes in such cute little containers.

#### \*WE ARE ENGINEERS CUTTING ACROSS THE CAMPUS

We care not for Beauty,  
We are Engineers.  
Machines that run do their duty,  
We are Engineers.
